"ALL-PURPOSE ELEVEN"
EVERBLOOMING ROSE COLLECTION**

Made up of eleven of the outstanding Roses of America. Each year we travel thousands of miles checking and observing the performance of different Roses. Varieties must have thoroughly proven themselves before being included in this group.

We believe this collection consists of 11 Roses which will give the average Rose grower complete satisfaction no matter what state he lives in. It is "All-Purpose" for the following reasons:

First—Because of the wide range of colors. Practically every color known in the Rose world is represented in this collection.

Second—Because they are hardy in all sections of the country. Even in far northern climates they do well if given average winter protection.

Third—Because they are offered at a price which all America can afford. No premium prices are asked for these splendid Roses.

Krider's Ten Commandments On Rose Growing

1st, Location. Rose bed should be in a sunny location and the soil should be of good garden grade and well drained. Fertilizer or well rotted manure should be thoroughly worked into the soil as the bed is spaded.

2nd, Care Before Planting. Unpack and plant Roses as soon as received from the nursery if at all possible. If you cannot plant at once, unwrap the plants and heel them in the ground until ready to set in their permanent places.

3d, Planting. In planting, set the plants with the bud, or joint, just above the roots, about 1½ inches below the surface of the soil. Have holes large enough to avoid crowding of the roots and be sure soil used for filling in is finely pulverized. Tramp soil firmly a couple of times as the hole is filled and leave a slight depression around each plant to retain water. Allow 18 to 24 inches between plants when figuring the number of plants needed for a bed.

4th, Care After Planting. If some plants appear dead and refuse to leaf out within a reasonable length of time after planting, try covering them with a piece of wet burlap. Soak the burlap with water two or three times daily and leave over the plant 48 hours. This will make most of them start leafing very soon. Some varieties seem to be slower than others in starting and we find the above method will sometimes literally bring out plants that appear to be brown and entirely dead. Try it, and you will be amazed at the results.

5th, Pruning. As soon as planting is completed see that all plants and the soil around them is thoroughly soaked with water. Cut back all canes to a length of 4 or 5 inches at planting time. This is very important as the root system of a newly transplanted Rose bush will not be able to leaf the canes to their entire length and many times plants will simply die in trying to do so. Each succeeding spring all canes should be cut back to the 4- or 5-inch height as stated above. This causes strong new growth and abundant bloom to develop.

6th, Fertilizing. Keep the Rose planting well watered at all times when there is no natural rainfall. A reasonable application of fertilizer applied twice during the summer months, with an interval of at least 30 days between applications, will induce added growth and extra quality in blooms.

7th, Cultivation. Frequent cultivation after planting will maintain a dust mulch on top of the soil which will conserve moisture and continue growth. Rather shallow hoeing gives best results and keeps the beds free from weeds. Keep soil loose this way until about Aug. 1, after which it is well to allow the stock to harden and mature for wintering.

8th, Spraying. For leaf spot and aphids apply Krider's Multi-Purpose Spray or Dust. Apply every two weeks or as often as needed. For slugs or leaf eating worms apply arsenate of lead.

Remedies for Chewing Insects. Leaf-eating insects such as beetles, weevils, grubs, worms, etc., are controlled by poison applied to the leaf. Arsenate of lead is most commonly used. Rotenone or pyrethrum should be used on vegetables. DDT is effective on some things, for instance, leaf-miners, chinch bugs in lawns, codling moths on fruits.

Combinations of fungicide and insecticide chemicals are time savers for the small garden. These materials come under various trade labels. Consult us and we will be glad to offer suggestions.

9th, Watering. Don't sprinkle beds—wet them thoroughly. If a hose is used, remove the nozzle and let the water soak into the ground until it is saturated for several days after good drenching like this. Water in the evening or early morning if possible.

10th, Preparation of Soil. Any soil that will grow good Potatoes or garden plants will grow good Roses. It is not necessary that the Rose bed be entirely of clay soil. Good, thoroughly enriched gravel soil, or loam soil, will grow as good Roses as clay. The only time it is desirable to add some clay is if the soil of the Rose bed is pure sand.

2143 HARDY MULTIFLORA ROSE PLANTS

For Dense, Stock-Proof Living Flowering Fences, also Farm Fences

Most of you have no doubt read the articles appearing in various magazines recommending the Multiflora Roses for use on farms and suburban property. This is the type of Wild Rose understock onto which Hybrid Tea Roses are budded. It grows prolifically and is hardy in the most extreme situations. Seems to withstand cold and drought and thrive in poor soil. It is the answer to your search for something to make a living fence which will, when matured, be practically stock or trespasser proof. The branches grow spreading and tightly massed. Grows rapidly and quickly forms a dense fence or hedge. May be trimmed if desired. Plant 12 inches apart for a dense, tight fence or hedge; 18 to 24 inches apart for a property line fence or looser hedge.

**STURDY, TWO-YEAR, No. 1, FIELD-GROWN AND BUDDED
PLANTS—WILL START BLOOMING SIX TO EIGHT WEEKS
AFTER SPRING PLANTING**

2160 FLORADORA Characterized by extremely sturdy, vigorous growth and abundance of blooms. Color is a sparkling coral-orange-red in the open blooms. Buds are perfectly formed and open slowly after cutting. Not unusual for a clustering spray to have from 7 to 10 blooms open and a number of unopened buds at one time. Each plant bears literally hundreds of blooms during the long season from early June until freezing fall weather. Both for massed plantings or for cutting plants you will find Floradora one of the hardiest, freest flowering plants you've ever grown. **2-year, No. 1 plants for bloom this summer, \$1.25 each; 3 for \$3.25; 6 for \$6.00; 12 for \$11.00; 25 for \$20.00, postpaid.**

Scintillating Cinnabar-Red Floribunda, "Floradora"

2159 CHATEAU A red to end all reds. Color is so intense and so scintillating that even the wonderful red of Etoile de Hollande seems pale beside it, and the color holds without fading as long as the blooms last. As with other Floribundas, plants are very hardy, grow under adverse soil and weather conditions and bloom abundantly from spring until freezing in late fall. "Chateau" grows about 24 inches high and blooms have stems sufficiently long for cutting. If you want a really bright color for beds or along a drive, get this one. **2-year, No. 1 plants, \$1.25 each; 3 for \$3.25; 6 for \$6.00; 12 for \$11.00; 25 \$20.00, postpaid.**

2158 CINNABAR Very similar to "Floradora" in growth and blooming habits except that the color on newly opened blooms is a brighter cinnabar-red in this variety. **2-yr., No. 1 plants, \$1.25 each; 3 for \$3.25; 6 for \$6.00; 12 for \$11.00, postpaid.**

Deep, Dark, Satiny Red Floribunda, "Chateau"

KRIDER'S ROSE GUARANTEE

We guarantee all of our Roses to be 2-yr., No. 1. field-grown plants in respective varieties and as good quality as you can get anywhere at any price, no matter what you pay; to reach you in as good condition and if grown side by side under like conditions, will produce as good results.

WHAT ARE FLORIBUNDAS?

Floribundas are an entirely different and distinct group of Roses. They are extremely hardy, doing well under the most adverse conditions. They are the most prolific of bloomers. Floribundas start blooming very early in June in midwestern areas and continue to produce constantly until freezing weather. In this respect they resemble the Polyanthas; however, their blooms are more like the Hybrid Teas in form. Size of flowers depends on variety but many of them are almost as large as those of regular Hybrid Teas. They grow vigorously with canes from 20 to 30 inches in height, according to variety. Floribundas are one of the best plants we know of for bedding and for borders. Their foliage is attractive and not easily subject to disease, and their constant blooming habit makes them desirable wherever a long and colorful flowering season is needed.

Petals have wavy, rippling edges. Ideal for massed plantings. **2-year, No. 1 plants, \$1.25 each; 3 for \$3.25; 6 for \$6.00; 12 for \$11.00; 25 for \$20.00, postpaid.**

(Plant Pat. No. 993)

- FRUITS GIGANTIC IN SIZE
- RICH RED COLOR THROUGHOUT
- FLAVORFUL HONEY SWEETNESS

The latest, newest and best in Everbearing Strawberries. A cross of Wayzata everbearer and Fairfax June bearer, which has produced a gigantic berry of perfect form and a superior, honey-sweet flavor.

Deep red color all the way through the firm flesh. The large size, color and flavor are maintained throughout the bearing season.

The ideal berry for quick freezing as the firm flesh does not get mushy after thawing out for use. Red Rich is without an equal as a dessert berry because of its superlative flavor and unusual sweetness. Very little sugar is required.

An exceptionally heavy producer. Last season 4,000 quarts were picked from a 1-acre planting. Bearing season begins early with a heavy crop and continues on through October, producing abundantly. Bears a pint per plant first season. Double that second year.

THE GROWING OF BLACKBERRIES and RASPBERRIES

Plant Raspberries in well drained cultivated soil. Set plants with the crown or eye about 1 inch below ground level. Raspberries should be set 4 feet apart each way. As soon as the bearing season is over, all old wood or canes should be cleaned out and new growth cut back about one-third. This permits good bearing wood to develop the next year's crop.

Vernon Krider
Middlebury, Indiana

July 16, 1893

Dear Friend:
This is not a letter, only a friendly notice. We were in Portland over the weekend, just returning last evening. This morning going into the back yard to see if all was well and found the Peace Rose with 3 full blossoms and 2 buds. The Festival with 2 full blossoms and 3 buds. These were in bloom 6 weeks after planting.

Your friend,
C. E. H.

Dear Sirs:

Last year I placed an order for perennials. I do want to say when I received them I was amazed. The perfect condition that each individual plant arrived in and the way they grew after they were planted gave me worlds of pleasure. I want to thank you. Am looking forward to receiving this year's order.

Sincerely,
Mrs. J. W. McN.

3114 MacDONALD RHUBARB

FOR GIANT STALKS, DELICIOUS FLAVOR

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Flavor is mild and pleasing. This new Rhubarb never becomes tough or stringy. Just cut in small chunks and cook. Do **not** remove the tender skin; it cooks right up with the stalk. **Nice, 2-year divisions, 60c each; 3 for \$1.50; 10 for \$5.00, post-paid.**

3115 THE FAMOUS FLAVORFUL MARTHA WASHINGTON ASPARAGUS

The first vegetable to come up in the spring garden. 100 roots will supply the average family and will last for years. Set 10 inches apart in rows. Spread the roots out in the bottom of the holes and tamp soil firmly. Plant so that there is about 2 inches of soil over the crowns of the plants. **2-year-old roots, \$1.00 per doz.; 25 for \$2.00; 100 for \$6.00, post-paid.**

BLUEBERRY CULTURE:

Set plants 4x4 feet apart in cultivated acid soil. Blueberries must have acid soil to thrive and if your soil is not acid, mix in liberal quantity of peat moss to attain acid condition. Use plenty of peat or leaf mold around roots when setting plants. Keep well watered at all times unless you have them planted in a low spot where natural moisture abounds.

3116 GIANT FRUITED CULTIVATED BLUEBERRIES

AMERICA'S FINEST NEW HOME GARDEN FRUIT; FRESH, CANNED or FROZEN

Grow successfully from coast to coast. **Big profits, as bushes bear heavily and market is always good. Early berries bring from 35c to 50c a pint.**

The ideal plant for low spots where soil is sour. On higher ground some woods dirt or well rotted leaves should be mixed into the soil, as they require an acid condition.

Plants last a lifetime when once established. The plants we offer will start bearing the first year after planting.

May be used as an ornamental shrub, as foliage and blooms are very attractive. If you do not have room for them elsewhere, plant them along the shrub border.

For field planting, space 5 by 7 feet and keep cultivated.

(Note: We send assorted varieties to insure pollenization.)

Bearing age, 18- to 24-inch plants, 2 for \$3.00; 5 for \$6.50; 10 for \$12.50, postpaid.

Krider's APPLE TREES

- 3200 **DOUBLE RED DELICIOUS.** Red Delicious is a marvelous improvement over the common Delicious. It is a much deeper color without stripes where the common Delicious would be striped red and partly green. Even in the heavily shaded portions of the tree the color is outstanding. Probably the most popular of all eating Apples. Largest seller in markets. Very highly flavored and stays crisp and juicy.
- 3201 **YELLOW DELICIOUS.** Similar to Red Delicious in shape. Fruit rich yellow color. Early bearing. Winter. Flesh fine grained, crisp, juicy and melting, and really delicious. The tree is a hardy and vigorous grower, and forms a strong, beautiful head capable of bearing enormous loads.

DO NOT ALLOW YOUR PHLOX TO GO TO SEED This is Very Important

Keep blooms cut as they fade. If you permit plants to go to seed they will drop hundreds of seeds right around the base of the plant. Next year masses of seedlings will spring up. These usually have the old magenta color and soon kill out your true variety. This soon makes the bed a mass of seedlings.

4169 TEUCRIUM - Beautiful Perennial Hedge or Edging

Ideal for all edging work, or for low border hedges. Foliage is evergreen for ten months of the year and plants stay dwarf. Ten to fifteen inches is as high they they grow and an occasional very light trimming will hold their beautiful compact shape.

Hardy in all sections of the country and thrives in most any location. Ideal in front of low walls.

Should be planted 6 inches apart for a dense hedge. Note how effective Teucrium is when edging a perennial bed as illustrated.

Four to five plants in a group will make an ideal corner clump for a perennial bed or the corners of a Rose garden.

Don't fail to get some of these plants for that dwarf hedge you've been wanting.

4170 IBERIS—DWARF HARDY CANDYTUFT

One of the loveliest of the semi-dwarf plants. Foliage is almost evergreen, remaining green until almost New Years. Each spring the plant is covered so densely with white, snow-flake-shaped blooms that it really resembles a small mound of snow. Very hardy, easily grown and requires only average garden soil. Reaches only about 12 inches in height, which makes it invaluable for the foreground in perennial beds or for low borders.

4171 SEDUM "SPECTABILIS" OR "LIVE FOREVER"

One of the hardiest of all plants, it seems to thrive under the most difficult conditions. Withstands heat, drought, cold, and shallow, poor soil. Foliage is ornamental all summer long and the large, flat heads of clear pink blooms are produced on sturdy stems and in abundance. Plant ordinarily reaches 12 to 18 inches in height with bloom stems rising 10 to 12 inches above foliage during blooming season.

One of the greatest features of "Sedum Spectabilis" is its versatility. Use it as a flowering perennial in the foreground of the bed or border; plant it among low growing shrubs for increased foliage and color effects; set one plant in each of two pots or pails and use them on each side of the steps; place plants 12 or 16 inches apart in porch or window boxes; best of all is its extreme hardiness and the ease with which it can be grown.

Green Pfitzer Juniper

NOTE: The Silver Blue Pfitzer described below is similar to Green Pfitzer in habit of growth and in general appearance but foliage is a bright silvery blue in color.

5202 PFITZER JUNIPER

The well known, gracefully spreading, low-growing Evergreen with sweeping fronds of fresh green foliage. Very hardy and does well in sun or shade. Quite rapid in growth when once established. The spreading branches should be kept sheared to form a dense mass of foliage. Allow tips to grow to size desired and then keep in bounds by trimming. (See next page for other Evergreens which do well in shade.) 12- to 15-inch spread, \$2.00 each; 2 for \$3.75.

5213 SAVIN JUNIPER

Similar to Pfitzer but darker green. 12- to 15-inch spread, \$2.00 each; 2 for \$3.75.

5205 SILVER-BLUE PFITZER JUNIPER

(U. S. Plant Pat. No. 422)

Imagine all the famous good qualities of the Pfitzer Juniper now combined with a beautiful new silvery blue color. Color is as intense and even as the Koster Blue Spruce. Entirely hardy in any section of this country. Grows a little more compact and has slightly finer foliage than the well known green Pfitzer. Otherwise habits are the same. 12- to 15-inch spread, \$2.25 each; 2 for \$4.25.

5203 FASTIGIATA JUNIPER

The New Columnar Juniper

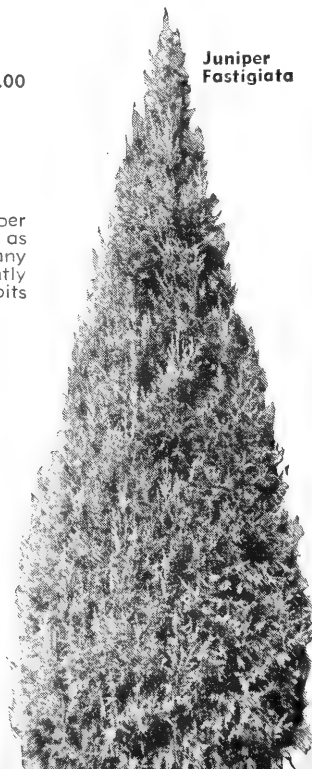

Similar to Irish Juniper in foliage and color but grows tightly compact and columnar. The last word in Evergreens for doorways and formal effect. We have a nice stock of these in 18-inch size, the nicest size for transplanting, and offer them at only \$1.75 each; 2 for \$3.25.

5204 NORWAY SPRUCE

A lofty, elegant tree of perfect pyramidal habit, rich in silvery green color. As the tree ages its branches become gracefully pendulous, making it exceedingly beautiful and picturesque. A splendid evergreen for specimen planting and also for windbreaks or backgrounds. 15 to 18 in., \$1.50 each; 2 for \$2.50.

Norway Spruce

Juniper Fastigiata

EVERGREENS

5206 Pyramidal ARBOR-VITAE

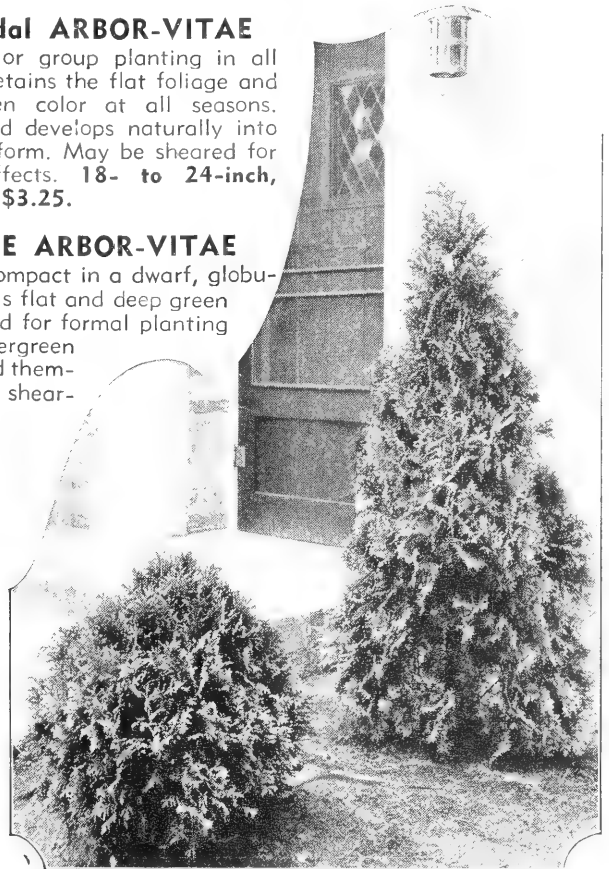

For foundation or group planting in all landscape work. Retains the flat foliage and lovely bright green color at all seasons. Grows compact and develops naturally into perfect pyramidal form. May be sheared for strictly formal effects. 18- to 24-inch, \$1.75 each; 2 for \$3.25.

5207 GLOBE ARBOR-VITAE

THE YEWS

Without doubt the Yews are among the finest and most luxuriant evergreens grown. They are extremely hardy, easy to grow, do well in shade, and harmonize with any other plant.

Globe Arbor-Vitae

Pyramidal Arbor-Vitae

5210 SPREADING YEW

The spreading variety throws out sweeping branches similar to Pfitzer Juniper. May be kept trimmed back to desired size or to fit allotted space. Foliage is a shade of deep green, soft to the touch and always fresh looking. May be kept sheared for a low hedge, allowed to grow its graceful wandlike branches for informal corner plantings or trimmed into compact shape for formal effects. After the plant is several years old, numerous red berries are borne close to the branches, remaining into winter. Well rooted, 12- to 15-in., \$2.50 each; 2 for \$4.50.

5211 UPRIGHT YEW

General foliage characteristics same as the spreading variety described above, but grows in columnar, erect form. By keeping the plant lightly sheared as it grows, the foliage will be extremely dense and compact from the ground up. Valuable for corner plantings and accent pieces. Does well in shade and seems to be very little affected by disease or pests. 15- to 18-inch., \$2.50 each; 2 for \$4.50.

5212 DOUGLAS FIR

A lofty, elegant tree of perfect pyramidal habit of growth. One of the really fine evergreens for specimen planting. Has a beautiful bluish color similar to the Blue Spruce. Well rooted, 15- to 18-in. trees, \$1.75 each; 2 for \$3.25.

NOTE: Unless otherwise noted all Evergreens are shipped by express.

White Spruce

5214 WHITE SPRUCE

Since White Spruce are grown from seed there is some variation in the blue shading, especially when the trees are young. Should be planted where they have plenty of sunshine to get best color effect. Very young trees are shapely but the typical symmetrical form comes as the plants grow to 3 feet or more in height. We offer well rooted, 12- to 18-inch trees at \$3.00 each; 2 for \$5.00.

5209 JUNIPER HORIZONTALIS

Moraine Locust

**THORNLESS, SEEDLESS, HARD WOOD,
FAST GROWING, LONG LIVED**

3434 NEW "MORaine" LOCUST

Plant Patent No. 836

AMERICA'S GREAT NEW SHADE TREE

Developed and introduced by Siebenthaler Company of Dayton, Ohio. The perfect answer to the demand for a clean, fast-growing, long-lived shade tree.

The MORaine LOCUST is a round headed tree when young but tall and vase-shaped when older. Mature trees attain a height of 80 to 100 feet with lower branches high enough to clear a two-story house. This feature permits planting the tree closer to the house than is the case with most other trees. Leaflets are small and in the fall they drift in between the grass blades on the lawn making very little raking or clean up. Very little pruning is needed as the lower limbs self prune as the tree grows. Tests show this new tree to grow more rapidly than either Silver Maple or Chinese Elm. It withstands drought and heat and cold. Thrives under adverse city conditions as well as on the plains where rainfall is slight. Excellent for either lawn or street planting. One of the best new tree introductions for American homes.

**NICE 5- to 6-Ft. BRANCHED TREES, \$6.00 each;
2 for \$11.50. By Express Only.**

RA-PID-GRO

MAKES A COMPLETE, QUICKLY AVAILABLE, EASILY PREPARED PLANT FOOD BY MERELY ADDING PROPER AMOUNT OF WATER. CONTAINS VITAMINS B₁ and B₂ PLUS ELEVEN OTHER VITAL PLANT FOOD ELEMENTS. CLEAN TO HANDLE, EASY TO USE, PRODUCES PHENOMENAL RESULTS.

WHAT IS RA-PID-GRO?

Ra-pid-gro is a complete concentrated plant food formula. Easily made into an immediately effective liquid fertilizer by simply adding water. It will speed up growth of plants now in place and will assure more successful transplanting of new plants.

HOW IS IT USED?

Just add water at the rate of 1 lb. of Ra-pid-gro to 22 gallons of water. Allow to dissolve and it's ready to use. Apply around each plant. For use on small numbers of plants mix at the rate of a teaspoonful to the quart of water.

WHAT WILL IT DO?

Ra-pid-gro will work almost unbelievable miracles in promoting rapid and healthy growth on all types of plants. Use it on lawns, around shade trees, evergreens, shrubs, roses, perennials, vegetables and house plants. Many times plants which have been given up for dead will respond to applications of Ra-pid-gro.

HOW DOES ITS COST COMPARE WITH OTHER FERTILIZERS?

Ra-pid-gro is less expensive than other fertilizers. In the larger quantities it makes your fertilizer cost about 1/2c per pound, as against a cost of about 3c per pound for average fertilizers. Remember 1 pound of Ra-pid-gro makes 176 pounds of rich and complete plant food.

STOPS EXPENSIVE AND TRAGIC TRANSPLANTING LOSSES Save Them With Ra-Pid-Gro

By using a large tub or pail and mixing Ra-pid-gro with water at the rate of 22 gallons of water to 1 pound, you have a solution in which to dip the roots of the plants before setting out. If this is done, you will practically eliminate transplanting losses. Trees, shrubs, roses, evergreens and similar plants should set in the solution 3 to 4 minutes. Berry plants 1 minute. Vegetables and house plants just dip and remove. Grass and vegetable seeds should be sprinkled with Ra-pid-gro before sowing. Use balance of solution for watering after planting plants or sowing seed.

HOW MUCH WILL I NEED?

Figure at the rate of 1 lb. of Ra-pid-gro for each 100 lbs. of other fertilizer you have been using. Or the manufacturer recommends the following: for a lot 40x60 ft. with 15 shrubs, 20 feet of hedge, 3 fruit trees, 2 evergreens, 12 roses and 800 sq. ft. of lawn, 5 lbs. of Ra-pid-gro for a season's feeding. A lot 40x100 ft. with 25 shrubs, 3 shade trees, 4 fruit trees, perennial bed, a few grapes and raspberries, 10 evergreens, a small vegetable garden and 1500 sq. ft. of lawn requires 10 lbs. per season. A lot 75x150 with 48 roses, 40 shrubs, 4 shade trees, perennials, 6 evergreens, hedge, vegetable garden, strawberry and raspberry patch, grapes, 10 fruit trees, and 4000 sq. ft. of lawn will require 20 lbs. of Ra-pid-gro per season.

NURSERY STOCK GUARANTEE

We guarantee that each plant shall be true-to-name, otherwise we will replace free of charge or refund purchase price of any proven not to be so. We guarantee that each plant shall be of a size and quality as described in this catalog, and that plants will reach the customer in good condition.

Our stock is handled very carefully and should grow for you. Stock lost after planting due to unfavorable weather or conditions beyond our control will be replaced at cost of postage, packing and handling charges in getting the stock to you, provided we are notified of such losses by July 15th, 1954, after planting. HOW TO PLANT AND GROW GOOD HEDGES

Beautiful hedges are easily grown if a few simple instructions are observed. Dig a trench 10 to 12 inches deep and the width of a spade. Set the plants a couple of inches deeper than they stood in the nursery. This insures a dense hedge at the base. Privet should be set 10 inches apart, Barberry about 18 inches. Shrubs such as Spirea 18 inches, Chinese Elm 2 feet, and Evergreens 2 to 3 feet. Spacing may be varied depending upon the density desired. After spacing plants, fill in about one-half of the depth of the trench, then flood with water. After settling fill in balance of the trench and tramp firmly. Leave a slight depression along each side of the hedge to retain water. Keep thoroughly soaked until well started. Privet should be cut back to about 8 to 10 inches after planting to promote vigorous growth. Hedges planted in this manner rarely fail to grow.

Old Lyme, Conn.
Sept. 15, 1953

Dear Sirs:

I just want you to know how pleased I am with the 3-color Althea. Last fall you sent me a replacement 3-color Althea which was to have red, blue and white blooms. It is in bloom right now and has four different blossoms. There are blue, dark red, white and light pink, every one is very excited over my shrub. I think an Althea with three color blooms is wonderful but think of one with four colors, it is outstanding.
